The aim of the AgeingWell project is to build and animate a European Network focused on improving the quality of life of Older Persons by promoting the market uptake of ICT solutions for Ageing well.

“Neurodegenerative Diseases”

|
Romania

The national event of **Ageing Well** Network in Romania, will be organised by **Ana Aslan International Foundation** and it will take place on the **31st of May 2013**, in Bucharest.

It will be promoted within the **BrainAging Conference**, where more than 200 participants are expected among medical professionals (nurses, doctors, researchers.), caregivers, care institutions (hospitals, medical centers), ICT solutions providers, etc.

The pillars of building a local and partner national network of ICT integrated services for old people in Romania will be one of topics approached in this event.

Science and Technology Resources Database

[Health Cluster Portugal](#) is managing Portugal's premier site for academic and scientific R&D projects: www.scienceportugal.com.

In this page visitors are able to search for R&D projects, for R&D institutions and for technical services offered in Portugal, by keyword and scientific area.

eHealth Interoperability Framework Study

The study on the eHealth Interoperability Framework, financed by the European Commission and conducted by Deloitte Consulting, has been finalised. The study defines a vision of an EU eHealth Interoperability Framework with four levels: technical, semantic, organisational and legal. It also assesses some technical specifications from the epSOS interoperability framework and from two consortia, IHE and Continua Health Alliance, against the identification criteria of the annex II of the Regulation on European Standardization.
